

Attention Ontario Beef Farmers!

Wondering what is in your cattle's water?

You may be interested in our study...

Who: Cow-Calf Beef Farmers

Where: Beef farms within a 3-hour drive of Guelph

What: A study on the impact of water quality on calf health

What you need to do: Let us collect untreated water samples, calf fecal samples, and conduct an on-farm questionnaire

Why: You will get a water quality report and information on pathogens found in your calves' fecal samples
